

Team name: Pseudocoders

Process achieved: Login/front page has been made along with signup pages of both donor as well as organizations. Also, the donor is given the feature to select a NGO to donate amongst a given list.

Roadmap: We started by making a front page for our website, then moving on we are having 2 interfaces, namely, donor and trust. Both will be shown different pages and different features.

Next step: We will be now moving towards the backend. Frontend is almost completed and now we will be trying to store the data on the local host.
